

Anti-Human Epithelial Cell Antibody, Clone 5E11.3.1, FITC

Mouse monoclonal IgG1 antibody against human epithelial cells, FITC-conjugated

Catalog #100-1671

100 Tests

20 µL/test

Product Description

This monoclonal antibody reacts with an unidentified marker expressed on the surface of most luminal cells of normal human mammary epithelium. Weak labeling (or no labeling) is observed within the basal cell compartment of the mammary epithelium. The 5E11.3.1 antibody gives variable labeling on malignant breast epithelium. Positive labeling is observed on the following cell lines: MCF7, CAMA, T47D, BT-10, BT-20, COLO 205, and WiDr. Labeling is negative on human bone marrow cells, blood cells, lymphoid and mesenchymal tissues, mammary and marrow fibroblast cultures, and human embryonic stem cell line H9.

Target Antigen:	Human Epithelial Cell
Alternative Names:	Not applicable
Gene ID:	4072
Species Reactivity:	Human
Host Species:	Mouse
Clonality:	Monoclonal
Clone:	5E11.3.1
Isotype:	IgG1, kappa
Immunogen:	Human mammary carcinoma cell line T47D
Conjugate:	FITC (Fluorescein isothiocyanate)

Applications

Verified Applications: CellSep, FC

Reported Applications: FACS, FC

Special Applications: This antibody clone has been verified for purity assessments of cells isolated with EasySep™ kits, including EasySep™ Direct CTC Enrichment Kit (Catalog #19657) and EasySep™ Human EpCAM Positive Selection Kit II (Catalog #17846).

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FACS: Fluorescence-activated cell sorting; FC: Flow cytometry; FCXM: Flow cytometric crossmatch assay; FISH: Fluorescence in situ hybridization; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IHC-F: Immunohistochemistry (frozen-tissue); IHC-P: Immunohistochemistry (paraffin-embedded); IP: Immunoprecipitation; NMR: Nuclear magnetic resonance spectroscopy; RIA: Radioimmunoassay; WB: Western blotting

Properties

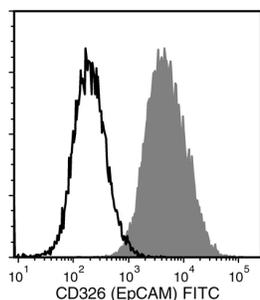

Product Formulation: Phosphate-buffered saline containing 0.1% bovine serum albumin and less than 0.1% sodium azide

Purification: The antibody was purified by affinity chromatography.

Stability and Storage: Product stable at 2 - 8°C when stored undiluted. Do not freeze. Protect product from prolonged exposure to light. For product expiry date, contact techsupport@stemcell.com.

Directions for Use: For flow cytometry, the suggested use of this antibody is 20 µL per 1×10^6 cells in 100 µL. The antibody also works well on paraffin sections; however, a heat-induced antigen retrieval protocol is required for optimal staining of formalin-fixed paraffin-embedded tissues. It is recommended that the antibody be titrated for optimal performance for each application.

Data

Flow cytometry analysis of human MCF7 cells labeled with Anti-Human Epithelial Cell Antibody, Clone 5E11.3.1, followed by Goat Anti-Mouse IgG Antibody, Polyclonal, FITC (Catalog #60138F); filled histogram), or Mouse IgG1, kappa Isotype Control Antibody, Clone MOPC-21 (Catalog #60070), followed by Goat Anti-Mouse IgG Antibody, Polyclonal, FITC (solid line histogram).
