

Human Recombinant IL-15, ACF

Interleukin 15, animal component-free

Catalog #78218	10 µg
Catalog #78218.1	100 µg
Catalog #78218.2	500 µg
Catalog #78218.3	1000 µg

Product Description

Interleukin 15 (IL-15) is a four-alpha helix bundle cytokine with many similar properties to IL-2. The IL-15 receptor is a heterotrimeric receptor composed of IL-15Ra (the high-affinity receptor for IL-15), as well as IL-2/15Rb (CD122) and common gamma chain (CD132). IL-15 binds to IL-15Ra receptor and can then be presented in trans to IL-2/15Rb and common gamma chain on other cells. Transpresentation is thought to be the major mechanism by which IL-15-mediated responses occur in mice, although may not be necessary in humans (Castillo et al.). The cytoplasmic domains of IL-2/15Rb and common gamma chain mediate signaling to activate JAK/STAT and PI3K pathways. IL-15 supports the survival and proliferation of naïve CD4⁺ and CD8⁺ T cells, and promotes homeostasis of memory T cells. IL-15 also promotes the survival and differentiation of NK cells and regulates their cytolytic activity (Ma et al.). This product is animal component-free.

Product Information

Alternative Names:	ILT, Interleukin15
Accession Number:	P40933
Amino Acid Sequence:	MNWVNVISDL KKIEDLIQSM HIDATLYTES DVHPSCKVTA MKCFLELQV ISLESGDASI HDTVENLIIL ANNLSSNGN VTESGCKECE ELEEKNIKEF LQSFVHIVQM FINTS
Predicted Molecular Mass:	12.9 kDa
Species:	Human
Product Formulation:	Lyophilized from a sterile-filtered solution containing sodium bicarbonate, pH 8.5.
Source:	E. coli
Purity:	≥ 97%

Specifications

Activity:	The specific activity is $\geq 1 \times 10^6$ units/mg ($EC_{50} \leq 1$ ng/mL), as determined by a cell proliferation assay using CTLL-2 cells.
Endotoxin Level:	Measured by kinetic Limulus amoebocyte lysate (LAL) analysis and is ≤ 0.1 EU/ μ g protein.

Preparation and Storage

Stability and Storage:	Store at -20 to -80°C. Stable as supplied for 12 months from date of receipt.
Preparation:	Centrifuge vial before opening. Reconstitute the product in sterile water to at least 0.1 mg/mL by pipetting the solution down the sides of the vial. Do not vortex. OPTIONAL: After reconstitution, if product will not be used immediately, dilute with concentrated bovine serum albumin (BSA) to a final BSA concentration of 0.1%. The effect of storage of stock solution on product performance should be tested for each application. As a general guide, do not store at 2 - 8°C for more than 1 month or at -20 to -80°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Data

Figure 1. Biological Activity and Molecular Mass of Human Recombinant IL-15, ACF

(A) The biological activity of Human Recombinant IL-15, ACF was tested by its ability to promote the proliferation of CTLL2 cells. The EC₅₀ is defined as the effective concentration of the growth factor at which cell proliferation is at 50% of maximum. The EC₅₀ in the above example is ≤ 1 ng/mL. (B) 1 μ g of Human Recombinant IL-15, ACF was resolved with SDS-PAGE under reducing (+) and non-reducing (-) conditions and visualized by Coomassie Blue staining. Human Recombinant IL-15, ACF has a predicted molecular mass of 12.9 kDa.
