

## Anti-Rat CD90 Antibody, Clone OX-7, PE

### Antibodies

Mouse monoclonal IgG1 antibody against mouse, rat, guinea pig CD90/CD90.1, PE-conjugated

Catalog #60024PE  
#60024PE.1

200 µg      0.2 mg/mL  
50 µg      0.2 mg/mL

### Product Description

The OX-7 antibody reacts with rat CD90 (Thy-1) and mouse CD90.1 (Thy-1.1), the latter being an allelic form of CD90 expressed by mouse strains AKR/J, PL, and FVB/N. The OX-7 antibody does not react with CD90.2, which is expressed by many mouse strains, including CBA and BALB/c. CD90 is a GPI-linked membrane glycoprotein and member of the immunoglobulin superfamily. The 25 kDa core protein is N-glycosylated at three sites, giving rise to molecules with a range of molecular masses (25 - 37 kDa). In the rat, CD90 is expressed by several cell types, including hematopoietic stem cells, immature B cells, thymocytes and neurons. In mouse strains expressing CD90.1, it is found on early-stage hematopoietic cells in the bone marrow, thymocytes, and circulating mature T cells. The OX-7 antibody has been reported to induce leukocyte activation, glomerular nephritis, apoptosis in glomerular mesangial cells, and vascular permeability.

|                      |   |
|----------------------|---|
| Target Antigen Name: | CD90/CD90.1   |
| Alternative Names:   | Thy-1, Thy-1.1  |
| Gene ID:             | 21838/24832   |
| Species Reactivity:  | Mouse (AKR/J and PL mouse strains), Rat, Guinea Pig, Rabbit |
| Host Species:        | Mouse (BALB/c)  |
| Clonality:           | Monoclonal  |
| Clone:               | OX-7  |
| Isotype:             | IgG1, kappa   |
| Immunogen:           | Rat thymocyte CD90 (Thy-1) antigen                          |
| Conjugate:           | PE  |

### Applications

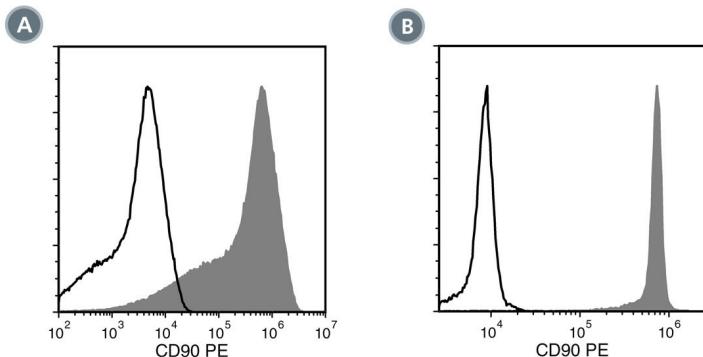

|                       |  |
|-----------------------|--|
| Verified:             | FC   |
| Reported:             | FC   |
| Special Applications: | This antibody clone has been verified for purity assessments of cells isolated from compatible mouse strains with EasySep™ kits, including EasySep™ Mouse T Cell Enrichment Kit (Catalog #19751) and EasySep™ Mouse T Cell Isolation Kit (Catalog #19851). |

Abbreviations: CellSep: Cell separation; ChIP: Chromatin immunoprecipitation; FA: Functional assay; FC: Flow cytometry; ICC: Immunocytochemistry; IF: Immunofluorescence microscopy; IHC: Immunohistochemistry; IP: Immunoprecipitation; WB: Western blotting

### Properties

|                        |  |
|------------------------|--|
| Formulation:           | Phosphate-buffered solution, pH 7.2, containing 0.09% sodium azide   |
| Purification:          | The antibody was purified by affinity chromatography and conjugated with PE under optimal conditions. The solution is free of unconjugated PE and unconjugated antibody.   |
| Stability and Storage: | Product stable at 2 - 8°C when stored undiluted. Do not freeze. Protect product from prolonged exposure to light. For product expiry date, please contact <a href="mailto:techsupport@stemcell.com">techsupport@stemcell.com</a> . |
| Directions for Use:    | For flow cytometry the suggested use of this antibody is ≤0.25 µg per 1 x 10 <sup>6</sup> cells in 100 µL volume. It is recommended that the antibody be titrated for optimal performance for each application.                    |

## Data

(A) Flow cytometry analysis of Sprague-Dawley rat brain cells labeled with Anti-Rat CD90 Antibody, Clone OX-7, PE (filled histogram) or a mouse IgG1, kappa PE isotype control antibody (solid line histogram).

(B) Flow cytometry analysis of Sprague-Dawley rat thymocytes labeled with Anti-Rat CD90 Antibody, Clone OX-7, PE (filled histogram) or a mouse IgG1, kappa PE isotype control antibody (solid line histogram).
