Product Description

Cyclopamine is a steroid alkaloid that inhibits the Hedgehog pathway at the point of the pathway activator Smoothed. Cyclopamine binds to the heptahelical bundle of Smoothed, a G protein-coupled receptor, and prevents it from signaling further downstream (Chen et al.).

Molecular Name: Cyclopamine
Alternative Names: 11-Deoxojervine; Jervine
CAS Number: 306387-90-6
Chemical Formula: C₂₇H₄₁NO₂
Molecular Weight: 411.6 g/mol
Purity: ≥ 95%
Chemical Name: (2'R,3S,3'R,3'aS,6'S,6aS,6bS,7'aR,11aS,11bR)-1,2,3,3'a,4,4',5',6,6',6a,6b,7,7',7'a,8,11,11a,11b-octadecahydro-3',6',10,11b-tetramethyl-spiro[9H-benzo[a]fluorene-9,2'(3'H)-furo[3,2-b]pyridin]-3-ol

Structure:

Properties

Physical Appearance: A crystalline solid
Storage: Product stable at -20°C as supplied. Protect from prolonged exposure to light. For product expiry date, please contact techsupport@stemcell.com.

Solubility: · Absolute ethanol ≤ 20 mM
For example, to prepare a 10 mM stock solution in absolute ethanol, resuspend 1 mg in 243 µL of absolute ethanol.

Prepare stock solution fresh before use. Information regarding stability of small molecules in solution has rarely been reported, however, as a general guide we recommend storage in absolute ethanol at -20°C. Aliquot into working volumes to avoid repeated freeze-thaw cycles. The effect of storage of stock solution on compound performance should be tested for each application.

Compound has low solubility in aqueous media. For use as a cell culture supplement, stock solution should be diluted into culture medium immediately before use. Avoid final ethanol concentration above 0.1% due to potential cell toxicity.

Published Applications

MAINTENANCE AND SELF-RENEWAL

- Reduces proliferation of rat neural progenitor cells and mouse neurospheres (Lai et al., Palma and Ruiz i Altaba).
- Reduces proliferation of mouse mammospheres (Liu et al.).
- Inhibits the growth of human and mouse medulloblastoma cells, and human glioblastoma cells (Bar et al., Berman et al.).

DIFFERENTIATION

- Promotes differentiation of pancreatic cells from human embryonic stem cells (D'Amour et al.).

CANCER RESEARCH

- Inhibits the growth of human and mouse medulloblastoma cells, and human glioblastoma cells (Bar et al., Berman et al.).
