

PRODUCT DESCRIPTION

This product is made from optically clear polystyrene. Plates are flat bottomed and supplied pyrogen-free and sterile.

Plates are non-tissue culture-treated, providing a hydrophobic surface for the attachment of Vitronectin XF™ or StemAdhere™ Defined Matrix for hPSC.

STABILITY AND STORAGE

Product is stable at 15 - 25°C.

DIRECTIONS FOR USE

For complete instructions on maintaining high quality human embryonic stem (ES) cells or human induced pluripotent stem (iPS) cells using Vitronectin XF™ or StemAdhere™ Defined Matrix for hPSC, refer to the corresponding documents listed in the table below. Documents are available on our website at www.stemcell.com or contact us to request a copy.
