Product Description

Sirtinol is a cell-permeable inhibitor of sirtuin NAD⁺-dependent histone deacetylases (HDACs), including yeast Sir2p (IC₅₀ = 68 μM; Grozinger et al.), human SIRT1 (IC₅₀ = 131 μM; Schuetz et al.), and SIRT2 (IC₅₀ = 38 μM; Grozinger et al.). It does not inhibit human HDAC1 activity (Grozinger et al.). Sirtinol also activates the auxin signaling pathway in Arabidopsis (Dai et al.).

Molecular Name:	Sirtinol
Alternative Names:	Sir Two Inhibitor Naphthol
CAS Number:	410536-97-9
Chemical Formula:	C ₂₆ H ₂₂ N ₂ O ₂
Molecular Weight:	394.5 g/mol
Purity:	≥ 98%
Chemical Name:	2-[[[(Z)-(2-oxonaphthalen-1-ylidene)methyl]amino]-N-(1-phenylethyl)benzamide
Structure:	

Properties

Physical Appearance:	A crystalline solid
Storage:	Product stable at -20°C as supplied. Protect product from prolonged exposure to light. For long-term storage store with a desiccant. For product expiry date, please contact techsupport@stemcell.com .
Solubility:	· DMSO ≤ 25 mM For example, to prepare a 10 mM stock solution in DMSO, resuspend 1 mg in 253 μL of DMSO.

Prepare stock solution fresh before use. Information regarding stability of small molecules in solution has rarely been reported, however, as a general guide we recommend storage in DMSO at -20°C. Aliquot into working volumes to avoid repeated freeze-thaw cycles. The effect of storage of stock solution on compound performance should be tested for each application.

Compound has low solubility in aqueous media. For use as a cell culture supplement, stock solution should be diluted into culture medium immediately before use. Avoid final DMSO concentration above 0.1% due to potential cell toxicity.

Published Applications

IMMUNOLOGY

- Suppresses inflammatory signaling in human dermal microvascular endothelial cells (Orecchia et al.).

CANCER RESEARCH

- Enhances apoptosis and cell death in leukemic cells, but not in healthy leukocytes and hematopoietic progenitors (Cea et al.).
- Induces senescence-like growth arrest in human cancer cell lines MCF-7 and H1299 (Ota et al.; Wang et al.).
